## Safety Precautions

Carefully read the labels on chemical containers prior to use. Chemicals are classified in four categories of toxicity:

- Category I, High Toxicity, Red label
- Category II, Moderate Toxicity, Yellow label
- Category III, Low Toxicity, Blue label
- Category IV, Light Toxicity, Green label

There are unique handling recommendations for each category, and you should familiarize yourself with them.

Always wear clothing and safety equipment that will provide appropriate protection against the materials you are handling. Equipment may include, but not be limited to:

- Long sleeve shirt
- Impermeable apron or coverall
- Impermeable gloves and boots
- Wide-brim hat
- Protective mask equipped with appropriate filters

Do not eat, drink, or smoke while handling chemicals or while you are spraying. Always handle chemicals in a well ventilated area while wearing appropriate protective clothing and safety equipment. **DO NOT STORE OR TRANSPORT CHEMICALS WITH FOOD OR MEDICINES, AND NEVER REUSE A CHEMICAL CONTAINER FOR ANY OTHER PURPOSE.**

Keep chemicals out of the reach of children, animals, or other unauthorized people. When not in use, store chemicals in a safe place. Never blow through nozzles, valve, pipes or any other component by mouth!

When handling chemicals and when spraying, make sure you are operating in accordance with local, state, and federal environmental protection rules and guidelines. Do not spray in very hot or windy conditions. **DO NOT POLLUTE THE ENVIRONMENT!**

After spray application, take a thoroughly cleansing shower using plenty of water and soap, then change into clean clothes. Protective clothing and safety gear should also be cleaned after each use. **IN CASE OF EXPOSURE TO DANGEROUS CHEMICALS**, seek a physician immediately and be prepared to provide the label from the chemical container.

## Calibrating the Sprayer

(Requires optional flow calibrator bottle, P/N 646901)

1. Hold the wand at the working height and spray a test pattern to measure the application band width.

2. Based on the band width, identify from the table below the walking distance required to calibrate the sprayer.

Band width	1.6 ft 0.5m	2.3 ft 0.7m	3.3 ft 1.0m	4.0 ft 1.2m	5.0 ft 1.5m
Distance to walk	165 ft 50.0m	120 ft 35.7m	80 ft 25.0m	70 ft 20.8m	55 ft

3. Attach the flow calibrator bottle to the wand:
  - a. Remove the nozzle, cap and filter from the spray wand.
  - b. Mount the flow calibrator cover to the spray wand.
  - c. Reinstall the nozzle, filter and nozzle cap.
  - d. Screw the flow calibrator bottle into the cover.

4. Using the flow calibrator bottle:
  - a. Operate the pump handle to maintain spray system pressure as you would when applying chemicals.
  - b. Hold the wand at your normal working position and spray into the bottle while walking the distance identified in step 2 above.
  - c. Place the bottle on a level surface and observe the liquid level visible through the side of the bottle. Match the liquid level to the 1/acre (liter per acre) scale on the calibration bottle.
  - d. Multiply the 1/acre (liter per acre) reading identified in step 4-c by .264 to determine your application coverage rate in gallons per acre.
  - e. Empty the bottle contents back into the sprayer tank.

### NOTE:

For improved accuracy in calibrating your application coverage, repeat steps 4-a through 4-e and average the results.

## Typical Nozzle Assemblies

Flat Fan Nozzle

Cone Nozzle

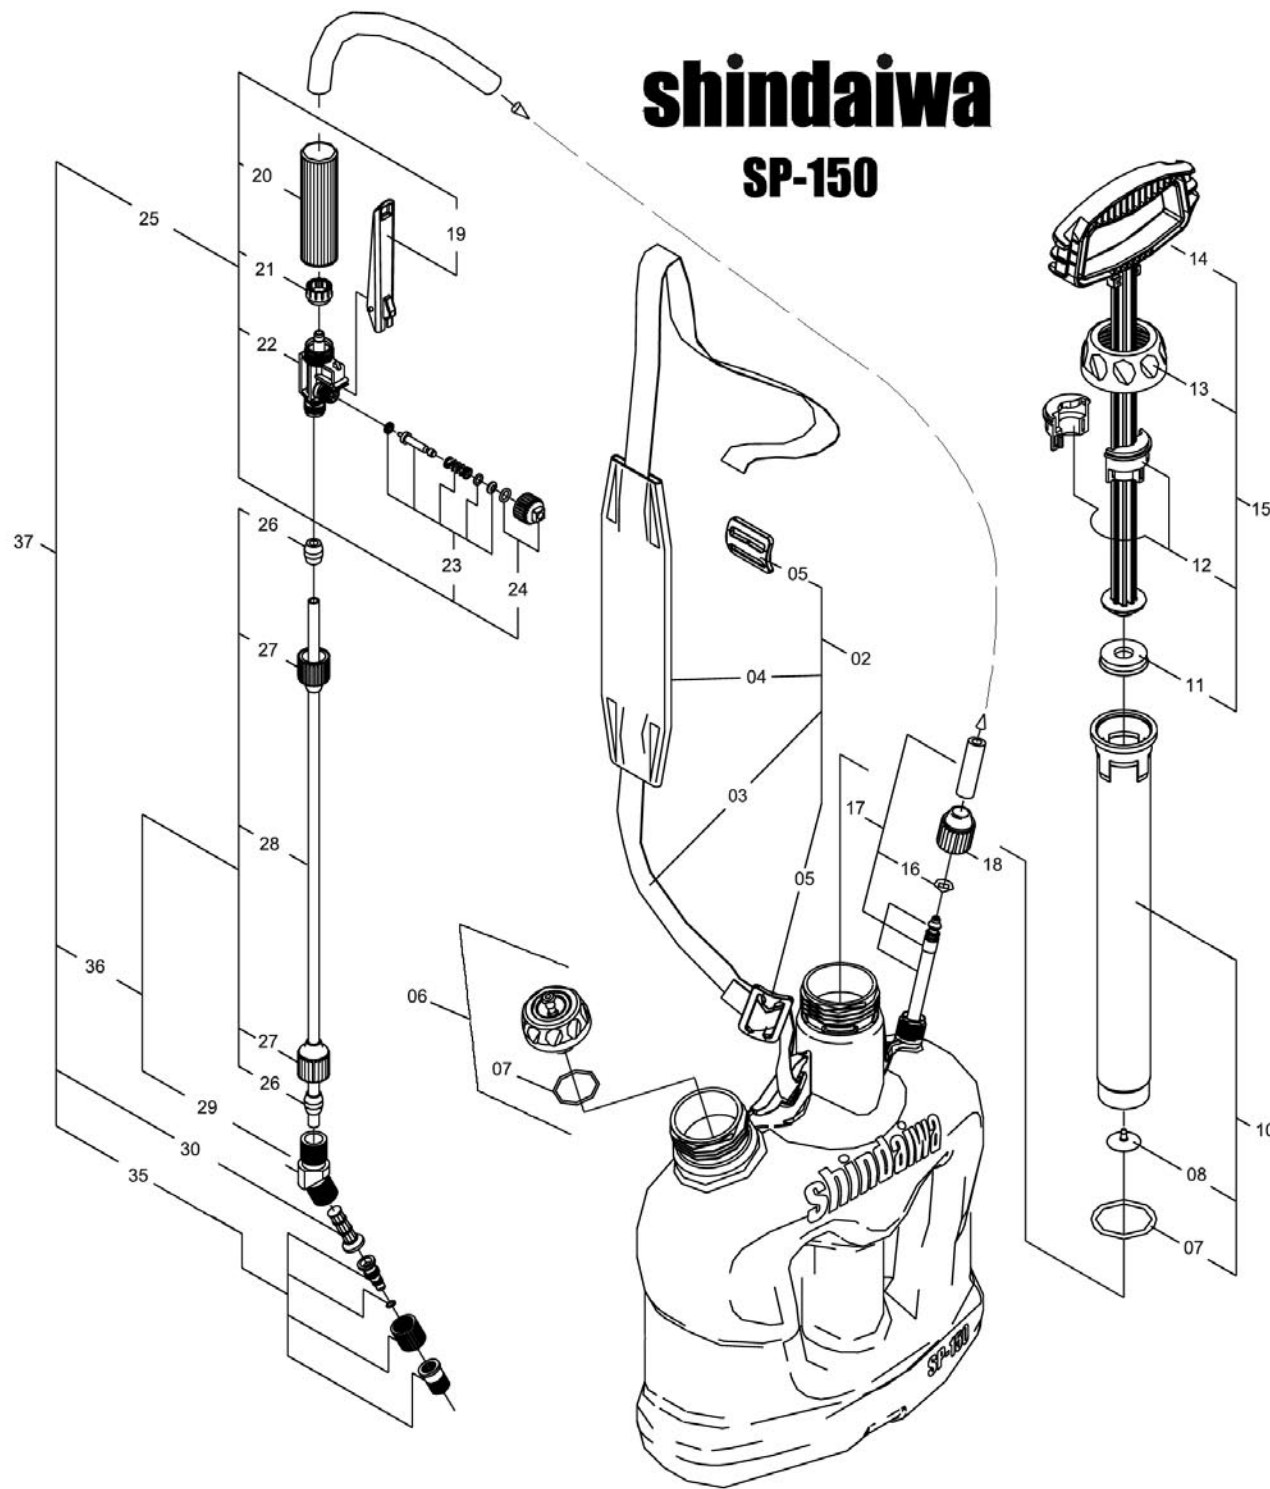

The spraying angle is changed by turning the tip

Adjustable Cone Nozzle

## Illustrated Parts List (SP150)

No.	Description	Part Number	Qty.
02	Strap Assembly	925198	1
03	Strap 1800mm	901018	1
04	Shoulder Protector SP-150	917477	1
05	Shoulder Strap Buckle	502757	2
06	Tank Lid Assembly	922550	1
07	O-Ring, Tank Lid	8000778	1
08	Diaphragm Valve (viton)	964270	1
10	Cylinder Assembly	285262	1
11	Piston Cup	285270	1
12	Bushing	285288	2
13	Cylinder Cap	285296	1
14	Pumping Handle	N/A	1
15	Pumping Handle Assembly	285312	1
16	O-ring ORI-110	8000236	1
17	Dip Tube With Hose	9012246	1
18	Screw Cap S-20	942193	1
19	Trigger	568972	1
20	Trigger Valve Handle	909192	1
21	Hose Ferrule	920470	1
22	Trigger Valve Body	909283	1
23	Trigger Valve Needle Assembly	105239	1
24	Trigger Valve Cap With Seal	996058	1
25	Trigger Valve Assembly	568782	1
26	Cone Packing	909309	2
27	Screw Cap	915744	2
28	Tube	336263	1
29	Elbow	635276	1
30	Nozzle Filter	592139	1
35	Ajustable Cone Nozzle (Red)	015024	1
36	Extension Assembly	568873	1
37	Spray Wand Assembly	568774	1
38	Seal Kit (Optional)	927850	1

**shindaiwa**  
**SP-150**

**38 - Tank Repair Kit (optional)**

Part Number	Description	Part Number	Description
	<b>761882</b> Spray hood is used for non-selective herbicides when spraying under windy conditions. Comes with Kematal 110-DEF-06 deflector fan nozzle and parts to assemble spray hood to your existing Shindaiwa spray wand.		<b>838052</b> Constant pressure valve reduces pumping action, reduces drift and delivers uniform spraying. Improves productivity and saves chemicals.
	<b>902296</b> Brass spray boom (27.5") for use with agrochemicals and foliar fertilizers applied to row crops. Provides 40" coverage. JD-12P cone nozzles and 40 mesh stainless steel filter included.		<b>565648</b> Plastic anti-drip valve for agrochemicals and foliar fertilizer application. Attaches to wand and is compatible with any type of cone or flat fan nozzle.
	<b>907873</b> Flexible annealed copper boom fitted with three JD-12P cone nozzles. For use with agrochemicals and foliar fertilizers on row crops. Can be easily shaped as appropriate to provide proper coverage. 40 mesh stainless steel filter included.		<b>568774</b> Spray wand assembly (21.6") Plastic handle, trigger valve and spray tube. 40 mesh stainless steel nozzle and trigger valve filters included. Fitted with adjustable cone nozzle.
	<b>831107</b> Brass extension (11.8") complete with plastic fittings for extra reach. Attachable to original wand.		<b>725267</b> All brass spray wand assembly (21.6") for extra duty applications. Trigger valve and spray tube are brass. 40 mesh stainless steel nozzle and trigger valve filters included. Fitted with JD-12P cone nozzle.
	<b>728139</b> Brass extension (23.6") complete with plastic fittings for extra reach. Attachable to original wand.		<b>229724</b> Nozzle cap for attaching flat fan and cone type nozzles.
	<b>100016</b> Brass extension (6.3") complete with two JD-12P cone nozzles for doubling output of agrochemicals and foliar fertilizers on perennials. 40 mesh stainless steel filter included.		
	<b>646901</b> Flow calibrator bottle. For accurate calibration of backpack sprayers to prevent waste and damage to the environment.		
	<b>336115</b> Brass Y nozzle for use on plants requiring heavy applications of fungicides. Complete with two JD-12P cone nozzles, 40 mesh stainless steel filter and plastic fittings.		

**AVAILABLE SPRAY NOZZLES**

Nozzle Type	Part Number	Application	Pressure psi (kg/sq.cm)	Flow Rate gal (ml)/min	
	437756 110-SF-015 Kematal green, 0.16 gpm @ 45 psi	Herbicides	45 (3.2)	0.16 (610)	
	437764 110-SF-02 Kematal yellow, 0.21 gpm @ 45 psi		45 (3.2)	0.21 (810)	
	437772 110-SF-03 Kematal blue, 0.33 gpm @ 45 psi		45 (3.2)	0.33 (1250)	
	717942 JD-10A Stainless steel	Agrochemicals and foliar fertilizers	45 (3.2)	0.08 (300)	
	217174 JD-12P Stainless steel		45 (3.2)	0.16 (615)	
	437855 110-LD-03 Kemetal blue, 0.33 gpm @ 45 psi		45 (3.2)	0.16 (615)	
			457317 HC-02 Kematal yellow	45 (3.2)	0.22 (830)
			457325 HC-04 Kematal red	45 (3.2)	0.44 (1680)
457333 HC-05 Kematal brown			15 (1.0)	0.54 (2060)	
	457390 DEF-04 Kematal red		15 (1.0)	0.25 (950)	
	457408 DEF-05 Kematal brown		15 (1.0)	0.32 (1200)	
	457416 DEF-06 Kematal gray		45 (3.2)	0.41 (1540)	
	323725 Yellow 0.08 gpm @ 45 psi.		45 (3.2)	0.08 (315)	
	015024 Red 0.17 gpm @ 45 psi.	45 (3.2)	0.17 (640)		
	325787 Blue 0.18 gpm @ 45 psi.	45 (3.2)	0.17 (640)		

**Note:** All Shindaiwa sprayers come with the red adjustable cone nozzle P/N 015024 installed as standard equipment.

## Maintenance

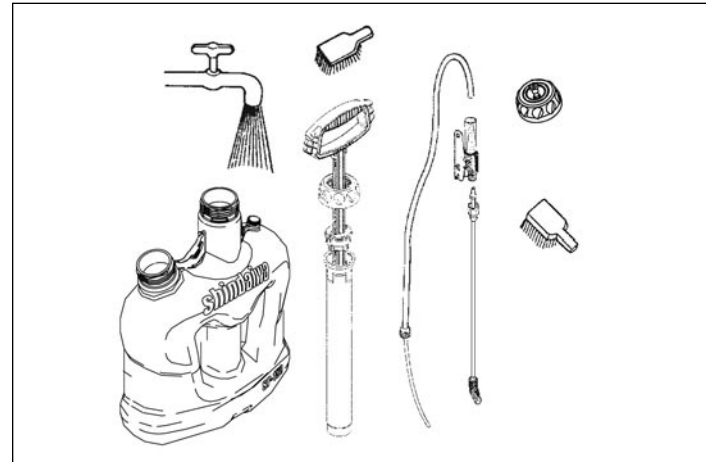

### Cleaning the Sprayer

#### WARNING!

Always relieve pressure from the sprayer tank by pulling the pressure relief valve before removing the tank lid.

After finishing the spray application, empty the sprayer and wash all equipment in an approved decontamination area.

#### WARNING!

Remove all chemicals and wash before storing the sprayer. Chemical products have different reactions and can cause damage to the sprayer components and the environment. Unidentified chemicals left in the sprayer tank can pose a serious health threat to anyone servicing the unit and unaware of its presence!

Periodically lubricate the pump handle, bushings and tank lid pressure relief valve with a light-weight machine oil.

### Pump Disassembly

1. Unscrew the cylinder cap and remove the pump chamber piston assembly from the tank.
2. Pull the pump piston out of the pump chamber.
3. Remove the piston cup from the pump piston.
4. Remove the diaphragm valve from the pump chamber.
5. Clean all parts and carefully inspect for worn or damaged parts and replace as necessary.
6. Reassemble in the reverse order.

#### NOTE:

Lubricating all moving parts with a high quality lithium grease will ease assembly and prolong the life of the unit.

### Troubleshooting

SYMPTOM	CAUSE	REMEDY
Lack of sprayer pressure and/or leakage at the cylinder.	Worn or damaged diaphragm valve and piston cup.	Replace the diaphragm valve and piston cup.
After pumping and pressurizing the tank, the pump handle rises slowly when released prior to being locked in place.	Diaphragm valve not sealing properly due to wear or impurities.	Clean or replace the diaphragm valve.
Sprayer will not hold pressure.	Hose seal, cap seal or pump chamber o-ring damaged.	Replace seals as necessary.
Tank lid difficult to remove.	Pressure relief valve inoperative.	Replace tank lid.

## Shindaiwa Limited Warranty

Shindaiwa Inc. manufactures its products to superior standards of quality to ensure customers obtain the highest level of satisfaction. In keeping with this goal, Shindaiwa Inc. warrants the SP150 sprayer to the original purchaser as follows:

### Warranty Period

One year from the delivery date to the original purchaser for consumer and commercial applications.

90 days for rental applications.

### Warranty Administration

Within the covered warranty period, Shindaiwa Inc. will, at their option, repair or replace any defect in material or workmanship, without charge for parts or labor, if this product is presented at an authorized Shindaiwa dealer.

### Warranty Exclusions and Limitations

Shindaiwa Inc. assumes no responsibility for damages, loss, or injury resulting from:

- Normal wear and tear
- Misuse or neglect
- Modifications to or removal of original component parts

The warranty is limited to the terms stated herein. Shindaiwa Inc. disclaims all liability for incidental or consequential damages. Some states do not allow the exclusion of incidental or consequential damages, so these limitations may not apply to you.

This warranty give you specific legal rights, and you may also have other rights which may vary from state to state.

Shindaiwa reserves the right to change the design or specifications of this product without obligation to modify previously manufactured products.

### Owner's Responsibilities

The owner of the sprayer must demonstrate reasonable care in the use, maintenance, and storage of this Shindaiwa product. If a warrantable failure should occur, the owner must deliver the product to an authorized Shindaiwa servicing dealer for correction. All residual chemicals must be flushed from the sprayer prior to delivery.

### Unidentified chemicals left in the sprayer tank can pose a serious health threat to anyone servicing the unit and unaware of its presence!

To obtain warranty service, proof of purchase must be presented to the authorized Shindaiwa servicing dealer when the product is presented for repairs.

Proof of purchase must include date of purchase and the name and address of the selling dealer.
